Estimated Volume of PCS:

TONS	CUBIC YARDS
------	-------------

Type of Contamination: (E.G. GASOLINE, DIESEL, WASTE OIL, #2, #4, #6 OIL ETC.)

PCS Description: (E.G. SAND, GRAVEL, SILT, CLAY, ETC.)

--

In addition, please circle if any of the following are present.

CLAY

VEGETATIVE MATTER

COAL

ASH

CONSTRUCTION DEBRIS

SILT

PCS Classification Method:

INDICATE THE TYPE OF CLASSIFICATION METHOD USED (AASHO, USAEC, ASEE, VISUAL ETC)

--

Methodology Used in Characterizing the PCS: (PLEASE CHECK SAMPLING METHOD)

COMPOSITE	GRAB	BIASED SAMPLES (E.G. HEADSPACE SCREENING, OLFACTORY)
-----------	------	--

Analytical Testing: (PLEASE CIRCLE THE TESTS PERFORMED)

TPH

VOC's

pH

FLASH POINT

REACTIVITY (S, CN)

PCB's

TOTAL METALS (As, Cr, Pb, Hg, Cd)

TCLP METALS (If required based on total levels)

FREE LIQUIDS

TOTAL ORGANIC CARBON (TOC)

Site History: (INDICATE CURRENT AND FORMER USE).

Generator Statements:

I, the generator, using due diligence have determined that there is no reason to suspect or believe the PCS has been impacted by any release of oil or hazardous materials other than that of the known source or I have identified the additional oil and hazardous materials that are suspected or known to be present in the PCS, in addition to those associated with the known release, including any anthropogenetic contaminates.

I, the generator, realize that due diligence shall consist of a search of information and records reasonably available to the generator of the PCS sufficient to make the determination. Such records and information may include, but are not limited to, those of the generator, location of generation (i.e. facility if not the generator), the Departments Bureau of Waste Site Cleanup and the municipality (i.e. Board of Health, Fire Department) within which the site is located.

All samples for VOC analysis were collected according to DEP policy #99-415.

I, the generator, have included sufficient information justifying the limiting of the analytical requirements as part of the Site History Information accompanying the 21E Bill of Lading (BOL) or Material Shipping Record (MSR). This includes at a minimum the following:

1. The analytical parameters selected
2. Any screening data (i.e., total data for TCLP, headspace data).
3. The laboratory data and Chain of Custody Form.
4. The description of the release
5. A physical description of the release.
6. A description of the site location with regards to former and current usage.

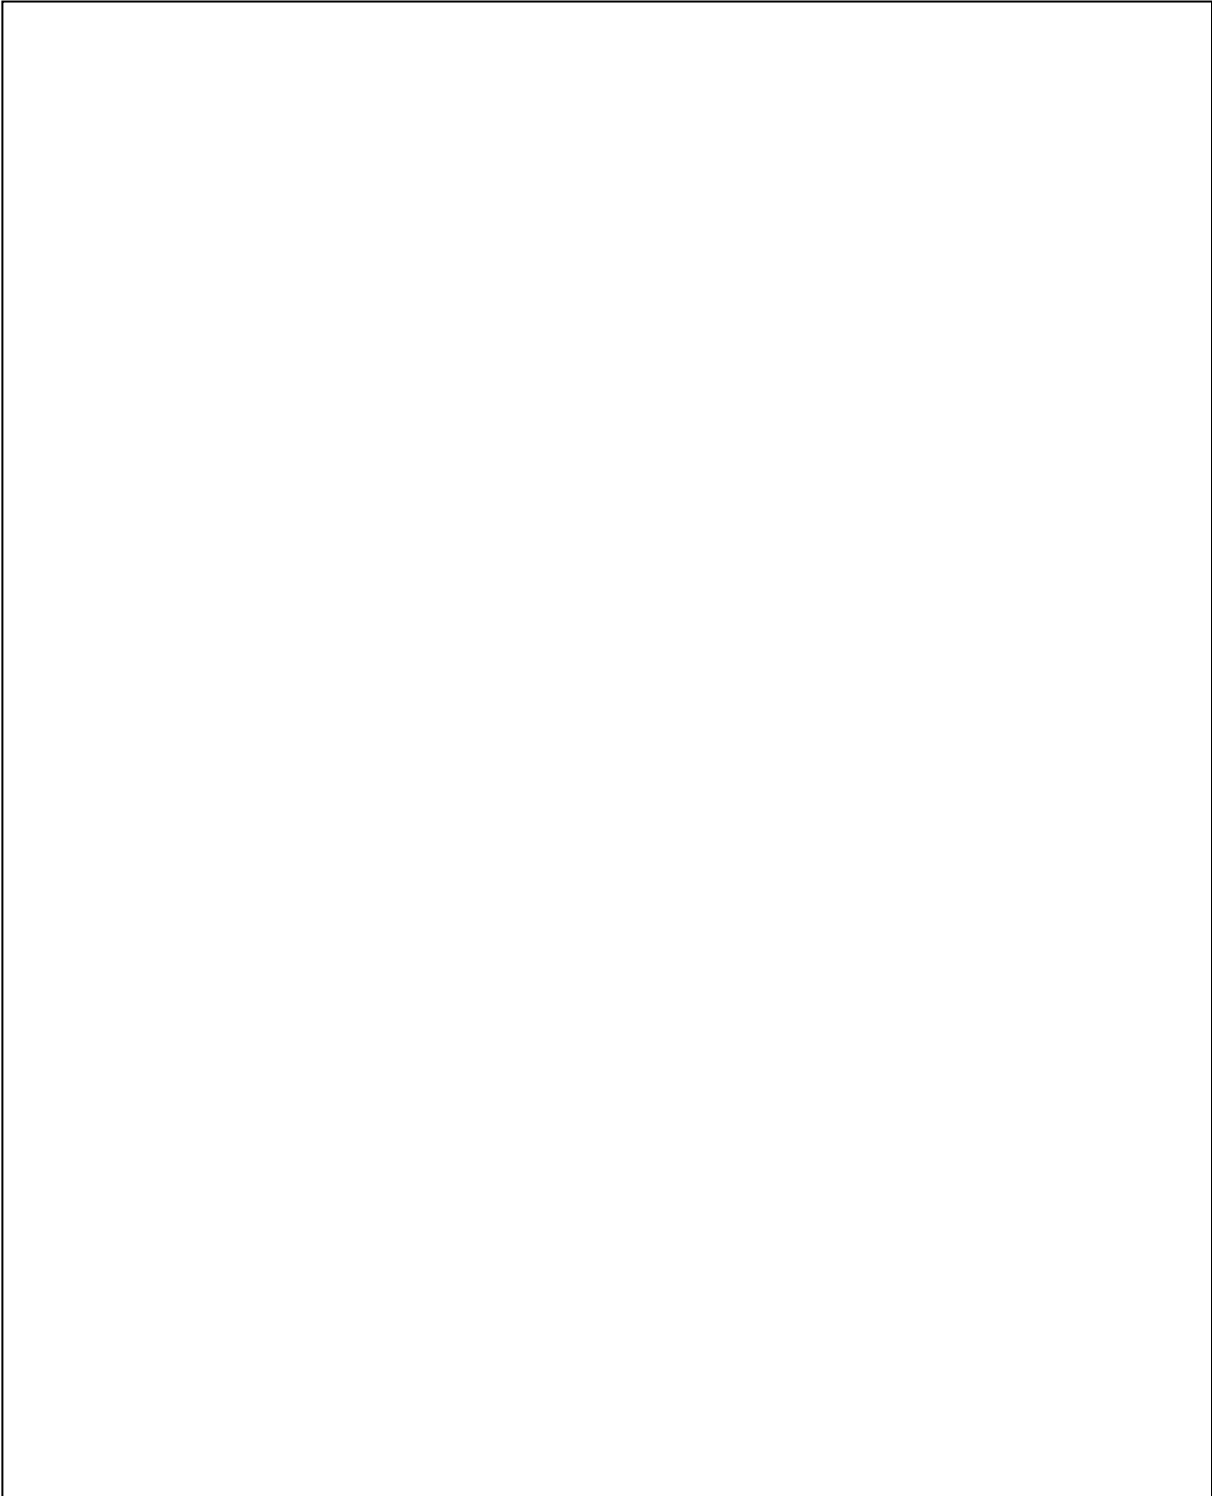

SIGNATURE OF GENERATOR:

GENERATOR – PRINTED NAME

DATE:

Site Diagram: (SIGNATURE OF PREPAROR): _____

Please provide a site diagram including at least one street reference, any adjacent structures, excavation area, stockpile location and the location(s) of samples taken for characterizing the PCS.

A large, empty rectangular box with a thin black border, intended for the user to draw a site diagram. The box is currently blank.
